SUZUKI

1991 FULL LINE

INTRODUCTION

For 38 years, we've been dedicated to building reliable, rugged, and affordable vehicles for people who want something more than identical-looking, identical-driving cars. You can see the results in our family of sport/utility vehicles and the Swift® line. There's our 4-door Sidekick®, for family adventures far away or close to home. The 2-door Sidekick for weekend getaways and everyday. The Suzuki Samurai®, the original vehicle for the original free spirit. And, if your needs run more towards four doors than 4-wheeling, there's the Swift GS--the 4-door family sedan that doesn't drive like a typical family sedan. There's also the Swift GT, our single-minded performance machine. And the Swift GA Hatchback: smaller on the outside, larger on the inside, the perfect commuter car. At Suzuki, we never tried to be an overnight success. Because some things can't be rushed. But if it's a Swift, Sidekick or Samurai, it is worth the wait.

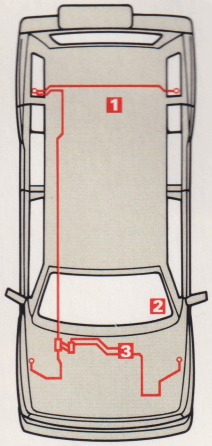

Suzuki vehicles have been proving themselves for some 20 years now. And these proving grounds stretch all over the world: in many places where a dirt road is a luxury.

Whether you're single or starting a family, work in an office or the wide open spaces, relax on a ski trail or a deserted beach, one of these Suzukis just might have your name on it.

In 2-wheel drive mode, the rear wheel anti-lock brake system, standard on all Sidekick models, automatically controls the brakes during hard stops. Using signals from the rear wheel speed sensor(1), the system's Electronic Control Module(2) adjusts rear brakeline pressure at the master cylinder(3). It keeps the rear wheels from locking and helps you maintain control of your Sidekick.

With 4-wheel drive and 8.5 inches of minimum running ground clearance, the Samurai JL can negotiate a lot more than your average flat, asphalt highway. And the 2-wheel drive Samurai JA and JS are packed with many of the same features under their fun-loving canvas tops (optional on the JA).

The 2-door Sidekick JX and JL have available 4-wheel drive for maximum agility whether you're heading up a trail or negotiating a less-than-perfect urban street. The 2-wheel drive JS has many of the same features, plus great EPA fuel economy figures, making it the perfect around-town family vehicle.

Adventure is the whole idea behind sport/utility vehicles. And Suzuki offers a full line of options for the adventure-loving. The 4-door Sidekick JX and JLX, and the 2-door Sidekick JX, JL and JS will bring out the explorer in you and comfortably pamper you on any expedition. The Suzuki 4-wheel drive Samurai JL and 2-wheel drive JA and JS turn an ordinary motoring experience into an exciting, entertaining journey. All these vehicles have a variety of features that make them a refreshing change of pace from the boring and boxy. Take our new 4-door Sidekick for example. It comes with standard 4-wheel drive, a spirited 1.6-liter, electronically fuel-injected engine and a generous 7.9 inches of ground clearance.

Inside the Sidekick JLX, you'll find convenient features like a power remote rear door lock release, remote fuel lid release, tachometer, tilt steering column, and luxurious, fully reclining front bucket seats. And all of these features you'd expect to be options are absolutely standard on the JLX.

The Swift line offers it all: from the fun-packed 4-door GA and upgraded 4-door GS, to the exciting and spirited Swift GT. If you're looking for reliable family transportation that doesn't scrimp on style or fun, look into the 4-door GA. If your family requires first-class amenities, take them on board the luxurious Swift GS. There's also a 3-door GA that delivers the economy of great gas mileage with the versatility of a hatchback. And for excitement, check out the performance and power of the 16-valve 100 horsepower (at 6500 rpm) engine of the Swift GT. Like all the Swift vehicles, the GT promises to be the ride of your life. And one low admission fee covers it all.

Inside the Swift GS you'll enjoy 39.1 inches of head room, 42.5 inches of leg room, and 51.4 inches of shoulder room. That's enough room for any growing family.

The high-performance Swift GT's multi-port fuel injected 16-valve, 100 horsepower (at 6500 rpm) engine can take you from 0 to 60 in 8.18 seconds. Then its 4-wheel disc brakes will help bring you to a sure, controlled stop. The GT's performance is matched only by its sporty interior and exterior.*
**Motor Trend, 1989*

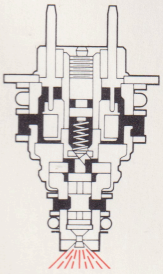

At 146.1 inches, the Swift GA Hatchback is easy to maneuver, even easier to parallel park, making it a great little commuter. And with figures like 39 EPA estimated city mpg and 43 EPA estimated highway mpg, we may not have made the gas station obsolete, but we're working on it.

The standard 5-speed manual overdrive synchronized transmission has the right gear ratios to deliver excellent fuel economy and maximum performance.

Open road testing on our rugged 4.1 mile test track helped us obtain reliable on-road performance from the Swift GA's 1.3-liter 4 cylinder, electronically fuel-injected engine.

Electronically-controlled, throttle-body fuel injection meters gasoline for quick starts in hot and cold weather along with maximum efficiency, minimum emissions, and consistent performance in all climates and conditions.
